

## Instruction Manual of Fire Alarm sound

(model : LW5609)

### Product Function:

When receiving fire alarm host control signal, The fire alarm sound device sends out strong voice alarm signal, remind the field personnel to pay attention to !

**Executive Standard: GA385-2002**

### Technical features:

| Item                     | Parameters        |
|--------------------------|-------------------|
| Operating voltage        | DC24V (+10%、-15%) |
| Operating current        | ≤20mA             |
| Dimensions               | Φ152mm            |
| Sound pressure level (A) | 75~115db          |
| Environment temperature  | -10℃~50℃          |
| Environment humidity     | ≤95%RH            |

(Version:20111128)
